SureNail® Technology

There's a line between a good shingle, and a great shingle.

It's the nailing line on your shingles. The difference between a good shingle and a great shingle is having SureNail® Technology. With SureNail® Technology, strength and durability are built into every Duration® Series shingle, thanks to the unique fabric strip in the nailing area. This shingle design provides outstanding gripping power.

SureNail® Detail

- **Patented SureNail® Technology** — Only from Owens Corning and featured on our Duration® Series shingles.
- **Breakthrough Design** — The tough-engineered woven-fabric nailing strip is embedded in the shingle to create a strong, durable fastener zone.
- **Triple Layer Protection®+** — A unique “triple layer” of reinforcement occurs when the fabric overlays the two shingle layers, called the common bond area.
- **Outstanding Grip** — The SureNail® strip enhances the already amazing grip of our proprietary Tru-Bond® sealant.
- **Exceptional Wind Resistance** — The SureNail® grip helps deliver 210KPH wind warranty* performance with fewer nails.

StreakGuard™ Algae Resistance Protection

Ditch the streaks - protect your home's curb appeal

Algae species are naturally occurring and transported through the air to attach themselves to shingles and other surfaces. While algae growth can cause brown or black streaks on roofs, it does not impact the performance of your shingles. Streaks caused by algae growth are more common in warm, humid climates but can occur in all regions of the country. Owens Corning has continued to advance their algae resistance protection based on over 30 years of testing and experience. Shingles with StreakGuard™ Algae Resistance Protection can help inhibit the growth of blue-green algae*.

Owens Corning Shingles with StreakGuard™ Algae Resistant Protection:

- Are supported by the #1 Trusted Brand in Roofing[†]
- Helps inhibit the growth of algae* to keep your home beautiful
- Gives homeowner peace-of-mind based on decades of Owens Corning testing and experience with algae resistance protection
- Is available on a wide variety of shingle styles and colours. Ask your contractor for specifics
- Has a limited lifetime warranty*

[†]2016 Roofing Homeowner Brand Awareness Survey by Owens Corning Roofing and Asphalt, LLC.

Owens Corning blends copper-lined granules into our colourful granules, which help resist algae growth.

The Building Agency has gained **CodeMark™** certification for our Owens Corning products. In doing so, we have reaffirmed that our Duration® series, Oakridge® Pro30 and Berkshire® ranges comply with the New Zealand building code, and are able to excel in New Zealand's unique environment.

CodeMark™ is the ultimate

Here's why:

- It has legal status equivalent to that of an Acceptable Solution or Verification Method.
- Ensures your roof is capable of performing as intended.
- Streamlines the building consent and inspection process.
- Is listed on the MBIE public register.

The Building Agency has made specifying Owens Corning™ shingles incredibly easy by including a "**Specify Now**" option on our website. A few simple clicks will give you all you need to go to council.
